joshcamp503@gmail.com
(503) 888 - 2479

SKILLS

-  React.js
-  Javascript
-  CSS
-  HTML
-  Node.js
-  Express.js
-  MongoDB
-  Git

PROJECTS

Audiophile Luxury E-commerce Website

React, Node/Express, MongoDB, JSON, Responsive Design github.com/joshcamp503/audiophile

- MERN stack - product data stored in MongoDB, served to React front end using Node.js & Express.js
- Browser-persisting Shopping Cart built from scratch with global state management and Local Storage
- 4 custom hooks, 25 unique components, over 3000 lines of code (~50% CSS and 50% Javascript/JSX)
- Guru-level project from frontendmentor.io online skills challenges

Where in the World? Geographic Info Resource

React, Fetch API, REST Countries API, Responsive Design github.com/joshcamp503/where-in-the-world

- Web app that provides geographic information for every country in the world
- Global state management with async Javascript and JSON data from the REST Countries API
- Filter and search functionality, and light mode/dark mode theme selector
- 3 custom hooks, 10 unique components, over 1200 lines of code (~50% CSS and 50% Javascript/JSX)

IP Locator IP Address Geolocator

github.com/joshcamp503/ip-locator

Leaflet.js, ipify API, Fetch API, Vanilla Javascript, CSS, HTML, Responsive Design

- Displays location data of any IP address entered into the search bar or location clicked on the map
- Map functionality provided by Leaflet.js library
- Used vanilla Javascript to fetch data from IPify API using information from IP Locator client and Leaflet.js
